MQTT protocol Poseidon2 4002 can connect up to <u>42 sensors</u> (16 via 1-Wire UNI / 1-Wire + 26 via RS-485), <u>12 detectors</u> via digital dry contact inputs (DI), 8 virtual digital outputs and 4 relay outputs (NO/NC). Thanks to its strong security combined with wide selection and high number of I/O Poseidon2 4002 is a secure solution for remote environment monitoring and control.

A built-in <u>web server</u> is used for configuring. The device can be monitored remotely over the internet using the free <u>SensDesk portal</u> in combination with the <u>SensDesk Mobile application</u> for iOS and Android. It works with <u>HWg-PDMS</u> and <u>HWg-Trigger</u>.

Poseidon2 devices are designed to monitor and control sensors and digital I/O over the network using **secure M2M protocols** (HTTPs, IPv6, SNMPv3). With support for **over 50 SNMP and SCADA applications**, Poseidon2 devices can be integrated in a wide range of monitoring and control systems. **MQTT** protocol enables integration in IoT solutions.

Connected via LAN. Configuration via built-in web server.

A sensor value out of a set safe range as well as a DI state change sends an alert by e-mail, SMS, SNMP Trap, or activates a remote relay at another Poseidon2 of Damocles2 unit.

For Ring or SMS alarm use the <u>HWg-Trigger software</u> (external GSM modem required), or a <u>HWg-SMS-GW3</u> <u>gateway</u> in the same LAN. All inputs feature 32-bit pulse counters that retain their status even after power failure.

With the <u>HWg-PDMS</u> <u>software</u>, SO pulses can be converted to cost per time period and exported to MS Excel.

Examples for programmers on using the product are available in the <u>HWg-SDK</u> (Borland C++, MS Visual, VB, C#, PHP, JAVA and more).

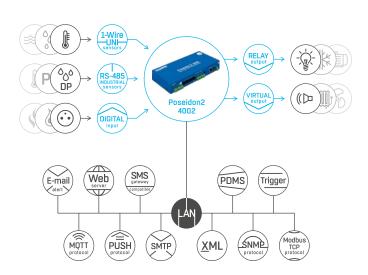

Compatible with a wide range of third party SW (SCADA etc.).

MQTT compatibility allows connecting to IoT Hub, MS Azure, AWS IoT, Bluemix Internet of Things and other cloud services.

Virtual Digital Outputs (VDO) can be mapped to physical digital outputs (relays) of other Poseidon2 or Damocles2 units on the same LAN.

### Typical application examples

- Remote environmental monitoring in a cabinet, server room or a datacenter
- Remote I/O control and monitoring over the Ethernet
- UPS / back-up generator monitoring
- Industrial applications
- HVAC monitoring
- Cooler and freezer monitoring + alarm indication
- · Security and surveillance systems
- Smart buildings
